1.2	DEPLOYING THE SOLUTION TO SHAREPOINT .....	3
1.2.1	<i>Via STSADM</i>	3
1.2.2	<i>Via Central Administration</i>	3

# 1 Installation

The Connected Systems Filtered Dropdown Feature for SPF 2010 installation process is straight forward. It has been packaged into a SharePoint® Solution called a WSP files. It has been scope at the “Farm” level which means it is available to every site collection in the Farm.

## 1.1 Adding Solutions to SharePoint

The WSPs are added to the Solution store like any other WSP solution, this is done using the following commands: (please ensure the STSADM command is accessible via the PATH environment variable)

```
STSADM -o addsolution -filename CS.SharePoint.FilteredDropDown.wsp
```

## 1.2 Deploying the Solution to SharePoint

Once added to the solution store using the commands listed above, each feature can be deployed to the appropriate site collection(s). This can be achieved using the following methods, either via STSADM or Central Administration.

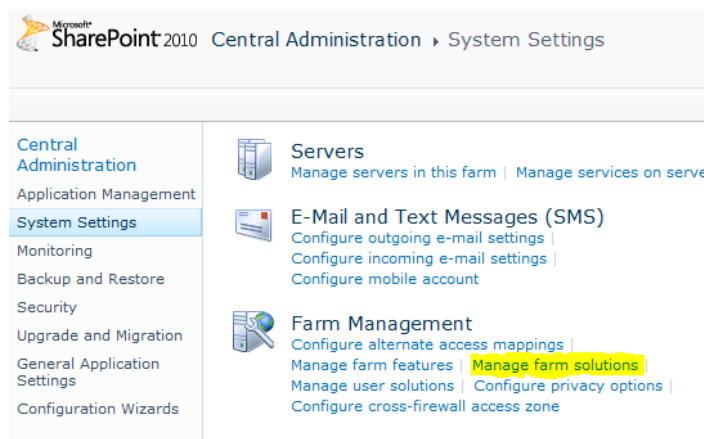

### 1.2.1 Via STSADM

The STSADM command is:

```
STSADM -o deploysolution -name CS.SharePoint.FilteredDropDown.wsp  
-immediate -allowgacdeployment -force
```

### 1.2.2 Via Central Administration

Alternatively, deployment of the solutions is achieved via “Central Administration | System Settings | Farm Management | Manage farm solutions”

Once selected and assuming there are no other solutions deployed to your farm, the solution will be listed as follows.

Name	Status	Deployed To
cs.sharepoint.filtereddropdown.wsp	Not Deployed	None

On selecting the “cs.sharepoint.filtereddropdown.wsp”, select the “Deploy Solution” command on the next screen. This will present the following:

**Solution Information**  
Information on the solution you have chosen to deploy.

Name: cs.sharepoint.filtereddropdown.wsp  
Locale: 0  
Deployed To: None  
Deployment Status:

**Deploy When?**  
A timer job is created to deploy this solution. Please specify the time at which you want this solution to be deployed.

Choose when to deploy the solution:  
 Now  
 At a specified time:  
 7/26/2010 4 PM 00

**Deploy To?**  
The solution contains no Web application scoped resource, and therefore cannot be deployed to a particular Web application. It can only be deployed globally.

This solution deploys globally.

**Warning:** Deploying this solution will place assemblies in the global assembly cache. This will grant the solution assemblies full trust. Do not proceed unless you trust the solution provider.

Please note that this solution deploys “Globally”, select OK to deploy. Once deployed, you’ll be returned back to the Solution Management page.

The deployment status should be “Deployed” on the solutions.
